BERMUDA DEMOCRATIC ALLIANCE

Poll Results 2010

Statement by Michael M. Fahy, JP

Press Release – Royal Gazette

“The Alliance is extremely satisfied with the poll results and what we have managed to achieve as a political party from the date of our official launch to the dates the polls were conducted. In less than two months, without an elected political leader and just one released platform, Bermudians see the Alliance as a viable political alternative to the status quo. We are confident that as we develop and release further platforms and elect an Alliance leader, the electorate will become increasingly confident in the Alliance’s ability to serve the Country.”

“Hard work, dedication and a belief in making Bermuda a place where the political legacies of the past will not burden the future is one of our goals. We believe we are on the road to achieving that goal and will continue to actively seek a wide support base from all of Bermuda. The fact that our highest racial support was from the “other” defined group demonstrates that our message of using our racial differences to bring us together as a community rather than to divide along political lines is getting through. We remain committed to solving the challenges facing Bermuda and believe that we can change the face of politics in Bermuda for the better.”
